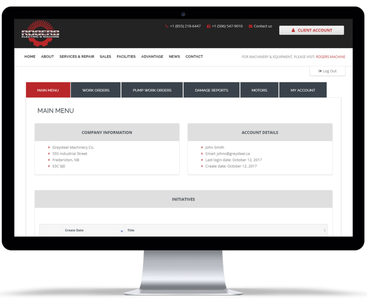
SHOP MANAGEMENT SYSTEM

Building Your Industrial IT Solution

> Websolution.ca's shop management system was a custom built IT solution that not only allowed us to greatly increase our company's efficiency but also, in turn, had a direct positive impact on our sales and overall customer satisfaction. Our continued partnership with Websolutions.ca truly allows us to stay ahead of our competition.

Todd Morrison
President, Rogers Electric Motor Service



More Than Just A Management System

When Rogers Electric & Machine decided it was time to increase their efficiency through a custom industrial IT solution, they turned to us. The final product is more than just a simple management system; it's a highly efficient multifaceted management hub that paved the way to increased sales, efficiency and customer satisfaction.

Account Management

Grant and remove permissions, add new clients and employees. You're in control.

Work Order Management Systems

Work orders are easily tracked, visualized and interacted with.

Time-sheet Management System

Gain a clear overview of the time-sheets, allowing for efficient management.

Increased Efficiency

Nothing says "Increased Efficiency" quite like having access to all your crucial data-driven decision-making information all in one place.

Increased Customer Satisfaction

Our client's customers gain access to their own personalized login to the system, keeping them up to date and happy!

Equipment & Inspection Tracking

Equipment or jobs are found quickly, granting access to all the crucial information.

The Platform That Made It Easy

Websolutions.ca specializes in understanding each of our industrial business clients. Given our technical expertise and our keen understanding of business processes, we're able to help them run more efficiently with custom platforms designed specifically for them.

	Material Number	Serial Number	Model	Motor Configuration
View	0	1-1753470		HP 400/267 / RPM 1784-1185 / Volts 4000 / Frame

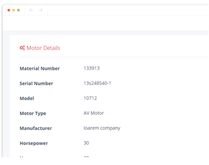
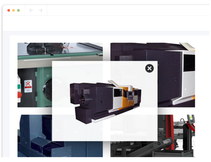
View	321278	931374	108717	HP 450 / RPM 595 / Volts 4000 / Frame 7808S

Details At A Glance

Don't even think about digging through that filing cabinet. Easily find what you're looking for through the detailed information pages. A lean yet powerful database allows Rogers Electric & Machine to easily sift through every detail with great efficiency, whether there are 10 entries or 100,000.





A Simple Image Gallery

Our client needed an easy way to maintain an accessible gallery of images documenting their work order process, allowing for on-demand access by their technicians and clients. That's the kind of feature only a custom software solution could properly offer. Are you still storing thousands of sub-folders on one office computer?

Personalized Experience

With many different types of users comes different types of experiences. Being able to tailor exactly what each user can see or do is the kind of control that shouldn't be a luxury. A powerful user experience customized for your business will increase security and give you peace of mind.
