

COUNTYLINE EQUIPMENT

Innovative Solutions for One of Ontario's Oldest and Most Lucrative Industries

Agriculture, Retail, Construction

Challenge

CountyLine Equipment supplies and produces farming equipment suited for Canada's poultry and hog sectors. However, operational inefficiencies paired with modern-day tools resulted in inadequate inventory management, limited business growth, and challenges for their team.

Solution

MNP worked alongside CountyLine to implement Acumatica's Cloud ERP. We helped their team determine vital requirements within the Procure to Purchase system while highlighting supply and demand management, inventory tracking, and pricing based on market trends.

Results

Acumatica ERP addressed all three tiers of operations; construction, field service and distribution, with minimal customization. Improved employee experience, streamlined project management, and inventory control measured by market demand have led to countless benefits.

Services Provided

Technology Advisory • Business Analysis • ERP Planning and Implementation • Training • Support Services
